Site Closure and Event Cancellation

The ATA site has been closed since March 14th and will remain closed until the government says we can open and after our Board and the City decide it is safe to do so. At our last online General and Membership meetings on Zoom, the issue was discussed in some detail. Initially the yard sale and the Small Engine Show were to be postponed till the Fall, but at the Board meeting it was agreed that we will probably have to cancel them for the year. As the province opens up further, we will continue to discuss the issue, but it was agreed that it would be premature to discuss reopening. We will look into planning what we would have to do to meet the guidelines being laid down by the governments and reported to us by the BC Museums Association.

Flywheel for those without e-mail

Last month those who do not have e-mail did not receive a copy of the newsletter. This month we have arranged a complicated way to mail the newsletter, so everyone will get one.

A Reminder:

Please note that, according to our Handbook, no ATA items are to be removed from the site without a form being filled out and upon approval by the Board.

Moving the Klassen cabin

Recently we posted a group of pictures to our Facebook page of the moving of the Klassen cabin many years ago. More than 600 people saw the pics, so we thought some of them might be of interest to all our members. Here are some of the pictures.

And here is the building finally in place. Note the empty space around it.

Facebook page

On May 23rd we put some pictures of our 1954 Dodge Woodward's truck on our Facebook page. We got the largest number of people reached since we started the page, 1225!!! Here's a couple of the photos.

The Woodward's truck and the 1931 Hayes-Anderson

Art Pohl and the Woodward's truck

1912 Detroit Electric

Vancouver Electric Vehicle Association have a 1912 Detroit Electric car, and a few years ago they asked if the battery charger had come to ATA when the Transportation Museum was dissolved. We did have it and we donated it to them.

Now they are asking if we have the rest of the charger, which is a control panel. They included pictures of what they thought it might look like. Does anyone remember if there was anything else with the Detroit Electric charger?
